low N management

POWER 4-4-16

Power 4-4-16 is a very high potassium to phosphate and nitrogen ratio auxiliary nutrient compound. It contains major nutrients that are designated for use on intensively managed turf grasses such as golf courses, athletic playing fields, etc. The high potassium in **Power 4-4-16** allows the turf manager to maintain adequate levels of potassium while supplying necessary nitrogen and phosphorous for critical growth and energy during stress periods.

- Balances Growth and Color
- Turf Hardiness
- Improves Nutrient Translocation

Power 4-4-16 also contains non-nutritional organic acids for complexed nutrient availability and uptake.

NUTRIENT CONTENT

| | |
|--|--------|
| Total Nitrogen (N) | 4.00% |
| 1.15% Ammoniacal Nitrogen | |
| 2.85% Urea Nitrogen | |
| Available Phosphate (P ₂ O ₅) | 4.00% |
| Soluble Potash (K ₂ O) | 16.00% |
| Sulfur (S) | 4.00% |

Derived from urea, ammonium phosphate, and potassium thiosulfate.

Net Weight: 11.22 lb/gal (1.345 kg/L)

Rate of Application: As a general turf maintenance application or as a pre-tournament green-up spray, apply 3-6 fl oz / 1000 sq ft (10-20 L/ha).
