# TRICAL PELLETS

PELLETIZED CALCIUM TECHNOLOGY

*Trical Pellets* are a proprietary formulation of highly concentrated precipitated calcium carbonate in pelletized form.

*Trical Pellets* are designed to ensure rapid availability for:

### *Turf Available Calcium*

- Cell Division & Strength
- Respiration & Root Development
- Defensive Stress Nutrition
- Internal Sodium Buffering

### *Soil Available Calcium*

- Beneficial Microbial Activity
- Salt Management / Soil Flushing
- Toxicity Buffering

targeting calcium

## PROFESSIONAL USE GUIDELINES

Floratine Products Group  
141 Eastley • Suite 106 • Collierville, TN 38017  
901.853.2898 • www.floratine.com

### NUTRIENT CONTENT

Calcium (Ca) . . . . . 5.00%  
Derived from calcium carbonate precipitate.

Net Weight: 12 x 0.5 lb (227 g) pellets

Rate of Application: Trical Pellets will dissolve at different rates depending on water pressure, chemistry, temperature, and flow rate.
